

Data Profile:

Understanding and Enhancing the Community Value of Traditional Retail Markets in UK cities

Introduction

This data profile describes a dataset held by the CDRC which has been supplied by the project 'Understanding and Enhancing the Community Value of Traditional Retail Markets in UK cities' (Project Reference: ES/P010547/1) conducted by the University of Leeds, the Open University, the NMTF, and the New Economics Foundation. The dataset contains interview transcripts, workshop notes, and focus group transcripts that are applicable for qualitative analysis, and survey data that is applicable for statistical analysis. The qualitative dataset includes transcripts of interviews, workshops, and focus groups about the community value of Traditional Retail Markets (TRM); the context and particularities of Bury Market, Grainger Market, and Queen's Market; and the market users' everyday life experiences of these three markets. The quantitative dataset includes the responses of Bury Market, Grainger Market, and Queen's Market users regarding the economic, social, and cultural value of these markets from a user perspective. Supporting documentation for the qualitative data includes a Data listing, Information sheets, Consent forms, and Topic guides (Full list in the ReadMe file). Supporting documentation for the quantitative data includes Recruitment leaflets, Information sheets, Questionnaires, and Variables description (Full list in the ReadMe file). More information about the project can be found at <https://trmcommunityvalue.leeds.ac.uk/>.

Research team: Sara González (Principal Investigator), Myfanwy Taylor (Research Fellow), Rosemary Wilkinson (Research Assistant), Andy Newing (Co-Investigator), Lisa Buckner (Co-Investigator), Graham Clarke (Co-Investigator), Paul Waley (Co-Investigator) at the University of Leeds; Sophie Watson (Co-Investigator) at the Open University; Frances Northrop and at an earlier stage Rachel Laurence (Co-Investigator) and Adrian Bua (Co-Investigator) from the New Economics Foundation; and Christopher Savage later replaced by Shanaaz Carroll from NMTF.

Scale and Extent

Field	Value
Data Provider	ESRC project 'Understanding and Enhancing the Community Value of Traditional Retail Markets in UK cities'
Analytical Units	TRM stakeholders and experts Individual market users Market user groups Traditional Retail Markets
Data Format	Rich Text Format files (rtf) Portable Document Format (pdf) Comma-Separated Values Format (csv)
Temporal Extent	Interviews: Jul 2018 – Jan 2020 Workshops: Sept 2018, Nov 2018, and Apr 2019 Focus groups: Jul 2019 Surveys: Mar - May 2019
Geographical Extent	Great Britain
Variables	178
Observations	Interviewees: 74 Workshop participants: 100 Focus group participants: 40 Survey participants: 1465

Citation Information

The following statement should be included when citing the use of this dataset:

"The data for this research have been provided by the Consumer Data Research Centre, an ESRC Data Investment"

Data Classification and Access Summary

These data are classified as Controlled and are available only upon approved application. To make an initial application, please visit: <https://www.cdrc.ac.uk/data-services/using-our-data/>

Content

Novelty

- This is the first dataset that provides the opportunity to investigate and analyse, both qualitatively and quantitatively, the community value of Traditional Retail Markets (TRM) in the UK. Interview, workshop, focus group transcripts, and survey data provide insights into how TRM stakeholders, experts, and users conceive the functions and values of the UK market sector. In particular, the dataset puts forward the perspective of TRM users, which have not been generally studied in such numbers. The dataset also provides the opportunity to analyse quantitatively and qualitatively three case studies: Bury Market, Grainger Market, and Queen's Market.

Quality

- Qualitative data collection was conducted by the project's research team between July 2018 and April 2020.
- Interviews were conducted with key informants with TRM responsibilities at the UK local and national level, as well as with TRM international experts; workshops with market managers and traders were held as breakout sessions during the NABMA and NMTF annual conferences (September 2018 and April 2019 respectively); and the workshop with campaigners was organised by the research team in November 2018. (See below for the objectives of each set of semi-structured interviews).
- The research team developed a set of criteria to select three case study markets. These criteria stated that these three markets should be large enough to support a 500-customer survey, have strong economic, social, and cultural roles and serve a diversity of customers. The team also selected markets in which both the operator and traders were interested in and broadly supportive of the research.
- Survey design was undertaken by the research team, in consultation with Fieldwork Assistance, an independent market research agency. Survey piloting took place in January and February 2019. The final data collection was conducted on behalf of the University of Leeds by Fieldwork Assistance.
- Fieldwork Assistance collected data from up to 500 market users (denoting customers/visitors) in each market, capturing a representative sample in terms of age, gender, and ethnicity based on the best available data. At Bury Market, the survey was conducted over 30 days in March 2019; at Grainger Market, the survey was conducted over 15 days during March 2019; and at Queen's Market, the survey was conducted over 15 days during March and April 2019. Data collection was conducted across the full range of days and hours that each market is usually open.
- At Queen's Market, recruitment leaflets, information sheets, and the survey questionnaire were translated and interpreted into Bengali, Gujarati, and Urdu to secure the participation of Asian women

Data Profile:

Understanding and Enhancing the Community Value of Traditional Retail Markets in UK cities

who either did not speak English and/or would not otherwise have spoken in public to an unknown fieldworker at Queen's Market. Interviewers were accompanied by interpreters that were recruited through the support of a local community group in Newham.

- Gender, age, and ethnicity quotas were established to recruit survey participants as follows:
 - At Bury Market: Female: 70%, Male: 30%; 18-30 years: 10%, 31-49 years: 25%, 50-59 years: 15%, 60-69 years: 35%, 70+ years: 15%; White: 90%, Non-white: 20%.
 - At Grainger Market: Female: 70%, Male: 30%; 18-30 years: 15%, 31-49 years: 20%, 50-59 years: 10%, 60-69 years: 35%, 70+ years: 20%; White: 90%, Non-white: 20%.
 - At Queen's Market: Female: 70%, Male: 30%; 18-30 years: 5%, 31-49 years: 15%, 50-59 years: 30%, 60-69 years: 30%, 70+ years: 20%; White: 20%, Asian: 55%, Black: 25%.
- Focus group participants were recruited via the user surveys by asking people if they would be willing to take part in a focus group session.
- Two 90-minute focus groups were also organised at each case study market, with survey respondents from selected typically marginalised or vulnerable user groups, which wider academic research tells us benefit most from the community value of markets.
 - At Bury Market: one focus group was run with market users over 50 years old and a second focus group with market users living in relatively more deprived areas.
 - At Grainger Market: one focus group was run with market users over 50 years old and a second focus group with market users living in low-income neighbourhoods.
 - At Queen's Market: one focus group was run with female market users who described their ethnic group as Asian or Asian British and a second focus group with market users who described their ethnic group as Black or Black British.
- The data have been pseudonymised, anonymised and cleaned checked for ethical compliance and consistency by the project's research team as part of the data preparation process. This research obtained ethical approval from the University of Leeds: Ref: AREA 17-116.

Representation and Bias

- Qualitative data may have been subject to the participants' availability and the conditions in which interviews, workshop, and focus groups took place.
- The use of semi-structured interviews produced a rich qualitative dataset whose topics are not entirely homogeneous throughout the transcripts.
- The field research company ensured that the required quotas in terms of respondents' age, gender, and ethnicity were met. The data therefore reflect these quotas.
- Interpreters were used at Queen's Market to try and maximise participation from important customer sub-groups who may not speak English.
- The timing of survey administration was carefully managed to avoid school holidays and other times of year and events which could have resulted in atypical behaviours.
- Within each market, surveys were administered at different times of the day, different days of the week, and in various locations within each market in order to capture different customer types.

Surveys - Field Level Metadata

PLEASE NOTE:

- Questionnaires were adapted to the contexts of Bury Market, Grainger Market, and Queen's Market. These changes concern variables q7, q8, and q32, and the variable's values in q18_1 to q18_43, q24_6, and q24_7, which include market-specific information. Changes are indicated as follows:
 - Square brackets and slashes have been used jointly in Description of Field to highlight these changes.
 - Slashes have been used in Values to highlight these changes. The first item always refers to Bury Market, the second one to Grainger Market, and the third one to Queen's Market unless otherwise stated.
- The corresponding variable descriptions for Bury Market, Grainger Market, and Queen's Market have been included in WP3_market_users_survey.zip. For more information, please refer to the Questionnaire in Supporting Documentation (WP3_Questionnaire_Survey_English.rtf).
- All blank cells in fields marked with an asterisk (*) represent missing data.
- Blank cells in the following fields are NOT missing data as they result from multiple choice or open questions: q3a, q5a, q6a to q6i, q9a, q10a, q11a, q14a, q15a, q18a, q24a, q25b, q27a, q29-q32, q38a, and q41a.

Field Name	Data Type	Description of Field	Values
